4.0 Building Specific Fire Safety Plans

The following pages contain specific fire and emergency response plans for each facility.

DATE REVIEWED:	DATE UPDATED:	CLASSIFICATION & LOCATION: \\adminnt.med.cornell.edu\ehs\Documentation\InternalProcedures\2.0FireSafety	PAGE: 3 of 66
February 10, 2026	February 10, 2026		

4.1 1300 York Avenue (Buildings A through E, LC, and W)

BUILDING-SPECIFIC FIRE SAFETY AND EVACUATION PROCEDURES

GENERAL INFORMATION

Building Address: 1300 York Avenue, New York, NY 10065

Fire Alarm System: Coded Fire Alarm with Public Address System

Evacuation Type: Staged Evacuation - All occupants must evacuate

Evacuation Routes: Vertical Evacuation

6A Stairwell (A-Building)	2 Stairwell (D-Building)
6B Stairwell (A-Building)	1A Stairwell (E-Building)
6C Stairwell (A-Building)	1B Stairwell (E-Building)
7A Stairwell (A/Harkness Building)	
3 Stairwell (C-Building)	

IF YOU SEE VISIBLE FIRE OR SMOKE:

R - Rescue - Remove occupants from the affected areas and provide assistance to others as appropriate.

A - Alarm - Shout “**FIRE**” to report a fire to the other occupants in the immediate area of the fire. Activate the nearest fire alarm pull station to alarm building occupants (includes automatic FDNY notification).

C - Confine - Close all doors, including interior doors and windows, to the area while exiting. This will help restrict the potential spread of the fire.

E - Evacuate/Extinguish - All building occupants must evacuate immediately using the nearest safe evacuation route.

- Do not use elevators.
- Notify NYP Security, EHS personnel, or the Fire Department of any injured and/or physically impaired occupants who are unable to evacuate.
- Remain available to answer questions about the fire and the affected area.
- In the event of a small fire, only trained personnel may attempt to utilize a fire extinguisher, and only after the above R.A.C.E. steps have been initiated.

IF THERE IS A FIRE ALARM ACTIVATION:

If you see visible smoke or fire in your area:

- Evacuate immediately following the evacuation procedures above—close doors while evacuating.

If you do not see smoke or fire:

- Listen for further announcements over the public address system.
- Continue your regular work duties.
- Monitor your area for any signs of visible smoke or fire. If you see fire or smoke, you must evacuate the building following the evacuation procedures above.
- If announcements instruct you to evacuate, you must evacuate following the evacuation procedures above.

4.6 CL - 53 W 23rd Street

BUILDING-SPECIFIC FIRE SAFETY AND EVACUATION PROCEDURES

GENERAL INFORMATION

Building Address: 53 W 23rd Street

Fire Alarm System: Fire Alarm System with Two-Way Voice Communication

Evacuation Type: Partial Evacuation - Fire Floor, Floor Above, and Floor Below

Evacuation Routes: Vertical Evacuation

Stair C

Stair D

Stair E

IF YOU SEE VISIBLE FIRE OR SMOKE:

- R - Rescue** - Remove occupants from the affected area. Provide assistance to others as appropriate. For patient care areas, rescue those in immediate danger from fire or smoke.
- A - Alarm** - Shout "FIRE" to report a fire to the other occupants in the immediate area of the fire. Activate the nearest fire alarm pull station to alarm building occupants (includes automatic FDNY notification).
- C - Confine** - Close all doors, including interior doors and windows, to the area while exiting. This will help restrict the potential spread of the fire.
- E - Evacuate/Extinguish** - Occupants on the fire floor and floor above the fire floor are required to evacuate immediately using the nearest safe evacuation route.
 - Do not use elevators.
 - Notify the Fire Department of any injured and/or physically impaired occupants who are unable to evacuate.
 - Remain available to answer questions about the fire and the affected area.
 - In the event of a small fire, only trained personnel may attempt to utilize a fire extinguisher, and only after the above R.A.C.E. steps have been initiated.

IF THERE IS A FIRE ALARM ACTIVATION:

Determine if you are on (1) a Fire Evacuation Floor or (2) an Alert Floor.

- Horn and strobe activation on your floor - Fire Evacuation Floor.
- Advisory tone only (no strobe activation) on your floor - Alert Floor.

Fire Evacuation Floor Response - Fire alarm activation is on your floor or the floor below.

- Evacuate immediately if you see fire or smoke, utilizing the evacuation procedures identified above. Otherwise, all personnel must immediately re-locate to their designated evacuation assembly areas.
- Listen for public address system announcements and/or to floor Fire Wardens for instruction. The public address announcement will state the location of the fire alarm activation and the appropriate evacuation response.
- Evacuate as directed.

Alert Floor Response - Fire alarm activation in building but not on your floor or the floor below.

- Listen for further announcements over the public address system and/or to Fire Wardens.
- Continue your regular work duties.
- Do not evacuate unless you see smoke or fire or are otherwise instructed by the Fire Department, Fire Wardens, or over the public address system. If instructed to do so, evacuate as directed.

4.14 DHK - David H. Koch Center

BUILDING-SPECIFIC FIRE SAFETY AND EVACUATION PROCEDURES

GENERAL INFORMATION

Building Address: 1283 York Avenue New York, NY 10065

Fire Alarm System: Coded Fire Alarm with Public Address System and Warden Phones

Evacuation Type: Partial Evacuation - Horizontal Evacuation of Immediate Fire Area

Evacuation Routes:	7 th Floor:	Vertical Evacuation	Horizontal Evacuation
		B Stairwell C Stairwell	Through smoke compartment barrier doors near Stair B Through smoke compartment barrier doors near Staff Locker Room
Evacuation Routes:	9 th Floor:	Vertical Evacuation	Horizontal Evacuation
		B Stairwell C Stairwell	Through smoke compartment barrier doors near Stair B Through smoke compartment barrier doors near Staff Elevators Through smoke compartment doors near Nutrition Office

IF YOU SEE VISIBLE FIRE OR SMOKE:

R - Rescue - Remove occupants from the affected area. Provide assistance to others as appropriate. For patient care areas, rescue those in immediate danger from fire or smoke.

A - Alarm - Shout "**Fire Safety Alert**" to report a fire to the other occupants in the immediate area of the fire. Activate the nearest fire alarm pull station to alarm building occupants (includes automatic FDNY notification).

C - Confine - Close all doors, including interior doors and windows, to the area while exiting. This will help restrict the potential spread of the fire.

E - Evacuate/Extinguish - Evacuate immediately using the nearest safe evacuation route.

- Do not use elevators.
- Notify the Fire Department of any injured and/or physically impaired occupants who are unable to evacuate.
- Remain available to answer questions about the fire and the affected area.
- In the event of a small fire, only trained personnel may attempt to utilize a fire extinguisher, and only after the above R.A.C.E. steps have been initiated.

IF THERE IS A FIRE ALARM ACTIVATION:

Count the Code

- Staff must listen and count the number of tones and gaps between the tones to determine the exact location of the alarm.
- Refer to the fire alarm code chart located next to each fire alarm pull station.
- Staff shall inform all others of the location of the Fire Safety Alert.

Fire Safety Alert is On Your Floor

- Defend in place.
- Listen for public address system announcements and/or to floor Fire Wardens for instruction. The public address announcement will state the location of the fire alarm activation and the appropriate evacuation response.
- Evacuate as directed.

Fire Safety Alert is NOT On Your Floor

- Listen for further announcements over the public address system and/or to Fire Wardens.
- Continue your regular work duties.
- Prepare to accept patients from neighboring units.

4.18 F - NYP Baker Tower

BUILDING-SPECIFIC FIRE SAFETY AND EVACUATION PROCEDURES

GENERAL INFORMATION

Building Address: 525 East 68th Street, New York, NY 10065

Fire Alarm System: Coded Fire Alarm with Public Address System

Evacuation Type: Partial Evacuation - Horizontal Evacuation of Immediate Fire Area

Evacuation Routes: Horizontal Evacuation (Primary) Vertical Evacuation (Secondary)

Nearest Area of Refuge
N, K, L, J and W Buildings

8, 9, and 12 Stairwells

IF YOU SEE VISIBLE FIRE OR SMOKE:

R - Rescue - Rescue patients in immediate danger from fire or smoke. Other occupants must remove themselves from the affected area.

A - Alarm - Shout "**FIRE SAFETY ALERT**" to report a fire to the other occupants in the immediate area of the fire. Activate the nearest fire alarm pull station to alarm building occupants (includes automatic FDNY notification). Call the NYP fire notification hotline: 212-746-FIRE (3473).

C - Confine - Close doors and windows in the affected unit and area (e.g., floor). This will restrict the potential spread of the fire. Seal doors with wet sheets or towels to prevent smoke from entering patient rooms. Locate personnel at medical gas valves for shutdown if authorized by the clinical staff. Clear corridors and restrict movement to maintain safe egress paths.

E - Evacuate/Extinguish - Occupants in immediate danger from a fire or smoke condition must evacuate horizontally to nearest area of refuge. Evacuate vertically down two or more floors when directed, or horizontal evacuation is unsafe. Do not use elevators.

- Notify NYP Security, EHS personnel, or the Fire Department of any injured and/or physically impaired occupants who are unable to evacuate.
- Remain available to answer questions about the fire and the affected area.
- In the event of a small fire, only trained personnel may attempt to utilize a fire extinguisher, and only after the above R.A.C.E. steps have been initiated.

IF THERE IS A FIRE ALARM ACTIVATION:

Determine the location of the fire.

- Listen and note the sequence of the tones. Tone sequence will repeat. Example: 4 tones – short pause – 1 tone.
- Go to the nearest Fire Stairwell and locate the Fire Alarm Code Card.
- Review the Code Card and determine the location of the fire alarm system activation. Example: "4-1" tones = 1st Floor, B-Building, 1300 York Lobby.
- Determine if the fire alarm activation is in your area.
- Listen for public address system announcements: "**FIRE SAFETY ALERT, FIRE SAFETY ALERT**" followed by the location of fire alarm activation and any further instructions.

Fire alarm activation located in your area.

- Search the immediate area to determine if an actual fire or smoke condition.
- Follow the R.A.C.E. procedures above. Do not activate pull station if alarm is already sounding.

Fire alarm activation not located in your area.

- Close all doors and restrict movement in corridors.
- Listen for further announcements over the public address system.
- Continue your regular work duties.
- Do not evacuate unless you see a sign of fire or are otherwise instructed by the Fire Department. If you are instructed to evacuate, follow the evacuation procedures above.

BUILDING-SPECIFIC FIRE SAFETY AND EVACUATION PROCEDURES

GENERAL INFORMATION

Building Address: 1320 York Avenue, New York, NY 10065

Fire Alarm System: Fire Alarm System with Two-Way Voice Communication

Evacuation Type: Partial Evacuation - Fire Floor and Floor Above

Evacuation Routes: Vertical Evacuation

- A Stairwell
- B Stairwell

IF YOU SEE VISIBLE FIRE OR SMOKE:

R - Rescue - Remove occupants from the affected area. Provide assistance to others as appropriate.

A - Alarm - Shout “**FIRE**” to report a fire to the other occupants in the immediate area of the fire. Activate the nearest fire alarm pull station to alarm building occupants (includes automatic FDNY notification). Call the NYP fire notification hotline: 212-746-FIRE (3473).

C - Confine - Close all doors, including interior doors and windows, to the area while exiting. This will help restrict the potential spread of the fire.

E - Evacuate/Extinguish - Occupants must evacuate immediately using the nearest safe evacuation route.

- Do not use elevators unless authorized by the Fire Department.
- Notify the Fire Department of any injured and/or physically impaired occupants who are unable to evacuate.
- Remain available to answer questions about the fire and the affected area.
- In the event of a small fire, only trained personnel may attempt to utilize a fire extinguisher, and only after the above R.A.C.E. steps have been initiated.

IF THERE IS A FIRE ALARM ACTIVATION:

Determine if you are on (1) a Fire Evacuation Floor or (2) an Alert Floor.

- Horn and strobe activation on your floor - Fire Evacuation Floor.
- Advisory tone only (no strobe activation) on your floor - Alert Floor.

Fire Evacuation Floor Response - Fire alarm activation is on your floor or the floor below.

- Evacuate immediately if you see fire or smoke, utilizing the evacuation procedures identified above. Otherwise, all personnel must immediately re-locate to their designated evacuation assembly areas.
- Listen for public address system announcements and/or floor Fire Wardens for instruction. The public address announcement will state the location of the fire alarm activation and the appropriate evacuation response.
- Evacuate as directed.

Alert Floor Response - Fire alarm activation in building but not on your floor or the floor below.

- Listen for further announcements over the public address system and/or Fire Wardens.
- Continue your regular work duties.
- Do not evacuate unless you see smoke or fire or are otherwise instructed by the Fire Department, Fire Wardens, or over the public address system. If instructed to do so, evacuate as directed.

4.26 J - NYP Connie Guion Building

BUILDING-SPECIFIC FIRE SAFETY AND EVACUATION PROCEDURES

GENERAL INFORMATION

Building Address: 525 East 68th Street, New York, NY 10065

Fire Alarm System: Coded Fire Alarm with Public Address System

Evacuation Type: Partial Evacuation - Horizontal Evacuation of Immediate Fire Area

Evacuation Routes: Horizontal Evacuation (Primary) Vertical Evacuation (Secondary)

**Nearest Area of Refuge
A,K, and F Buildings** 7, 8, and 13 Stairwells

IF YOU SEE VISIBLE FIRE OR SMOKE:

- R - Rescue** - Rescue patients in immediate danger from fire or smoke. Other occupants must remove themselves from the affected area.
- A - Alarm** - Shout "**FIRE SAFETY ALERT**" to report a fire to the other occupants in the immediate area of the fire. Activate the nearest fire alarm pull station to alarm building occupants (includes automatic FDNY notification). Call the NYP fire notification hotline: 212-746-FIRE (3473).
- C - Confine** - Close doors and windows in the affected unit and area (e.g., floor). This will restrict the potential spread of the fire. Seal doors with wet sheets or towels to prevent smoke from entering patient rooms. Locate personnel at medical gas valves for shutdown if authorized by the clinical staff. Clear corridors and restrict movement to maintain safe egress paths.
- E - Evacuate/Extinguish** - Occupants in immediate danger from a fire or smoke condition must evacuate horizontally to nearest area of refuge. Evacuate vertically down two or more floors when directed or when horizontal evacuation is unsafe. Do not use elevators.
 - Notify NYP Security, EHS personnel, or the Fire Department of any injured and/or physically impaired occupants who are unable to evacuate.
 - Remain available to answer questions about the fire and the affected area.
 - In the event of a small fire, only trained personnel may attempt to utilize a fire extinguisher, and only after the above R.A.C.E. steps have been initiated.

IF THERE IS A FIRE ALARM ACTIVATION:

Determine the location of the fire.

- Listen and note the sequence of the tones. Tone sequence will repeat. Example: 4 tones – short pause – 1 tone.
- Go to the nearest Fire Stairwell and locate the Fire Alarm Code Card.
- Review the Code Card and determine the location of the fire alarm system activation. Example: “4-1” tones = 1st Floor, B-Building, 1300 York Lobby.
- Determine if the fire alarm activation is in your area.
- Listen for public address system announcements: “**FIRE SAFETY ALERT, FIRE SAFETY ALERT**” followed by the location of fire alarm activation and any further instructions.

Fire alarm activation located in your area.

- Search the immediate area to determine if an actual fire or smoke condition.
- Follow the R.A.C.E. procedures above. Do not activate pull station if alarm is already sounding.

Fire alarm activation not located in your area.

- Close all doors and restrict movement in corridors.
- Listen for further announcements over the public address system.
- Continue your regular work duties.
- Do not evacuate unless you see a sign of fire or are otherwise instructed by the Fire Department. If you are instructed to evacuate, follow the evacuation procedures above.

4.30 LH - Lasdon House Residence/Administrative Offices

BUILDING-SPECIFIC FIRE SAFETY AND EVACUATION PROCEDURES

GENERAL INFORMATION

Building Address: 420 East 70th Street, New York, NY 10065

Fire Alarm System: Fire Alarm System with Two-Way Voice Communication

Evacuation Type: Total Evacuation Building – for office staff
Residents to follow Residential Fire Safety Plan and Notices

Evacuation Routes: Vertical Evacuation

A, B, C, D, F, and G Stairwells

IF YOU SEE VISIBLE FIRE OR SMOKE:

- R - Rescue** - Remove occupants from the affected area. Provide assistance to others as appropriate.
- A - Alarm** - Shout “**FIRE**” to report a fire to the other occupants in the immediate area of the fire. Activate the nearest fire alarm pull station to alarm building occupants (includes automatic FDNY notification). Notify Lasdon House desk attendant of fire.
- C - Confine** - Ensure EVERYONE leaves the room. Take keys to the apartment. Close, but do not lock doors to confine area and restrict spread of fire.
- E - Evacuate/Extinguish** - All building occupants must evacuate immediately using the nearest safe evacuation route. Do not use the elevators.
 - Notify Lasdon House desk attendant of fire. Remain available to answer questions about the fire and the affected area. Meet apartment members at a predetermined location.
 - Notify Lasdon House desk attendant, EHS personnel, or the Fire Department if any injured, physically impaired, or missing occupants are unaccounted for or unable to evacuate.
 - In the event of a small fire, only trained personnel may attempt to utilize a fire extinguisher, and only after the above R.A.C.E. steps have been initiated.

IF THERE IS A FIRE ALARM ACTIVATION:

For Staff in Administrative Areas: Total Evacuation Building

- All building occupants must evacuate immediately using the nearest safe evacuation route.
- Refer to the evacuation procedures above for additional information.

For Residents: Total Evacuation Building

The Residential Fire Safety Plan can be accessed on the EHS website: https://ehs.weill.cornell.edu/system/files/fsp_lh.pdf.

Feel your room door and doorknob for heat. If they are not hot, open the door slightly and check the hallway for smoke, heat, or fire.

- Exit your room and building if you can safely do so, following the Residential Fire Safety Plan instructions for a fire in your room.
- If you cannot safely exit the building, follow instructions below:
 - Call 911 and provide address, floor, apartment number, and number of occupants.
 - Seal the apartment doors, air ducts, or other openings where smoke may enter with wet towels or sheets.
 - Open windows a few inches at top and bottom unless flames and smoke are coming from floors below. Do not break any windows.
 - If conditions in the apartment appear life-threatening, open a window, and wave a towel or sheet to attract the attention of firefighters.
 - If smoke conditions worsen before help arrives, get down on the floor and take short breaths through your nose. If possible, retreat away from the source of the flames, heat, or smoke.

E - Evacuate/Extinguish - Partial Evacuation Building - Occupants must evacuate immediately using the nearest safe evacuation route.

- Do not use elevators unless authorized by the Fire Department.
- Notify the Fire Department of any injured and/or physically impaired occupants who are unable to evacuate.
- Remain available to answer questions about the fire and the affected area.
- In the event of a small fire, only trained personnel may attempt to utilize a fire extinguisher, and only after the above R.A.C.E. steps have been initiated.

IF THERE IS A FIRE ALARM ACTIVATION:

Determine if you are on (1) a Fire Evacuation Floor or (2) an Alert Floor.

- Horn and strobe activation on your floor - Fire Evacuation Floor.
- Advisory tone only (no strobe activation) on your floor - Alert Floor.

Fire Evacuation Floor Response - Fire alarm activation is on your floor or the floor below.

- Evacuate immediately if you see fire or smoke, utilizing the evacuation procedures identified above. Otherwise, all personnel must immediately re-locate to their designated evacuation assembly areas.
- Listen for public address system announcements and/or floor Fire Wardens for instruction. The public address announcement will state the location of the fire alarm activation and the appropriate evacuation response.
- Evacuate as directed.

Alert Floor Response - Fire alarm activation in building but not on your floor or the floor below.

- Listen for further announcements over the public address system and/or Fire Wardens.
- Continue your regular work duties.
- Do not evacuate unless you see smoke or fire or are otherwise instructed by the Fire Department, Fire Wardens, or over the public address system. If instructed to do so, evacuate as directed.

4.37 N - NYP Pediatrics Wing

BUILDING-SPECIFIC FIRE SAFETY AND EVACUATION PROCEDURES

GENERAL INFORMATION

Building Address: 525 East 68th Street, New York, NY 10065

Fire Alarm System: Coded Fire Alarm with Public Address System

Evacuation Type: Partial Evacuation – Horizontal Evacuation of Immediate Fire Area

Evacuation Routes: Horizontal Evacuation (*Primary*) Vertical Evacuation (*Secondary*)

**Nearest Area of Refuge 14 and 15 Stairwells
M Building and Greenberg Pavilion**

IF YOU SEE VISIBLE FIRE OR SMOKE:

- R - Rescue** - Rescue patients in immediate danger from fire or smoke. Other occupants must remove themselves from the affected area.
- A - Alarm** - Shout "**FIRE SAFETY ALERT**" to report a fire to the other occupants in the immediate area of the fire. Activate the nearest fire alarm pull station to alarm building occupants (includes automatic FDNY notification). Call the NYP fire notification hotline: 212-746-FIRE (3473).
- C - Confine** - Close doors and windows in the affected unit and area (e.g., floor). This will restrict the potential spread of the fire. Seal doors with wet sheets or towels to prevent smoke from entering patient rooms. Locate personnel at medical gas valves for shutdown if authorized by the clinical staff. Clear corridors and restrict movement to maintain safe egress paths.
- E - Evacuate/Extinguish** - Occupants in immediate danger from a fire or smoke condition must evacuate horizontally to nearest area of refuge. Evacuate vertically down two or more floors when directed, or horizontal evacuation is unsafe. Do not use elevators.
 - Notify NYP Security, EHS personnel, or the Fire Department of any injured and/or physically impaired occupants who are unable to evacuate.
 - Remain available to answer questions about the fire and the affected area.
 - In the event of a small fire, only trained personnel may attempt to utilize a fire extinguisher, and only after the above R.A.C.E. steps have been initiated.

IF THERE IS A FIRE ALARM ACTIVATION:

Determine the location of the fire.

- Listen and note the sequence of the tones. Tone sequence will repeat. Example: 4 tones – short pause – 1 tone.
- Go to the nearest Fire Stairwell and locate the Fire Alarm Code Card.
- Review the Code Card and determine the location of the fire alarm system activation. Example: “4-1” tones = 1st Floor, B-Building, 1300 York Lobby.
- Determine if the fire alarm activation is in your area.
- Listen for public address system announcements: “**FIRE SAFETY ALERT, FIRE SAFETY ALERT**” followed by the location of fire alarm activation and any further instructions.

Fire alarm activation located in your area.

- Search the immediate area to determine if an actual fire or smoke condition.
- Follow the R.A.C.E. procedures above. Do not activate pull station if alarm is already sounding.

Fire alarm activation not located in your area.

- Close all doors and restrict movement in corridors.
- Listen for further announcements over the public address system.
- Continue your regular work duties.
- Do not evacuate unless you see a sign of fire or are otherwise instructed by the Fire Department. If you are instructed to evacuate, follow the evacuation procedures above.

4.38 OH - Olin Hall Residence/Administrative Offices

BUILDING-SPECIFIC FIRE SAFETY AND EVACUATION PROCEDURES

GENERAL INFORMATION

Building Address: 445 East 69th Street, New York, NY 10065

Fire Alarm System: Coded Fire Alarm System

Evacuation Type: Total Evacuation Building - All building staff must evacuate
Residents are to follow Residential Fire Safety Plan and Notices

Evacuation Routes: Vertical Evacuation
N, S, A, F, W (Fire Tower) Stairwells

IF YOU SEE VISIBLE FIRE OR SMOKE:

- R - Rescue** - Remove occupants from the affected area. Provide assistance to others as appropriate.
- A - Alarm** - Shout "FIRE" to report a fire to the other occupants in the immediate area of the fire. Activate the nearest fire alarm pull station to alarm building occupants (includes automatic FDNY notification).
- C - Confine** - Ensure EVERYONE leaves the room. Take keys to the apartment. Close, but do not lock doors to confine area and restrict spread of fire.
- E - Evacuate/Extinguish** - All building occupants must evacuate immediately using the nearest safe evacuation route. Do not use the elevators.
 - Notify Olin Hall desk attendant, EHS personnel, or the Fire Department if any injured, physically impaired, or missing occupants are unaccounted for or unable to evacuate.
 - Remain available to answer questions about the fire and the affected area.
 - In the event of a small fire, only trained personnel may attempt to utilize a fire extinguisher, and only after the above R.A.C.E. steps have been initiated.

IF THERE IS A FIRE ALARM ACTIVATION:

For Staff in Administrative Areas: Total Evacuation Building

- All building occupants must evacuate immediately using the nearest safe evacuation route.
- Refer to the evacuation procedures above for additional information.

For Residents: Total Evacuation Building

The Residential Fire Safety Plan can be accessed on the EHS website: https://ehs.weill.cornell.edu/system/files/fsp_oh.pdf

- Feel your room door and doorknob for heat. If they are not hot, open the door slightly and check the hallway for smoke, heat, or fire.
- Exit your room and building if you can safely do so, following the instructions in the Residential Fire Safety Plan for a fire in your room.
- If you cannot safely exit the building, follow instructions below:
 - Call 911 and provide address, floor, apartment number, and number of occupants.
 - Seal the apartment doors, air ducts, or other openings where smoke may enter with wet towels or sheets.
 - Open windows a few inches at top and bottom unless flames and smoke are coming from floors below. Do not break any windows.
 - If conditions in the apartment appear life-threatening, open a window and wave a towel or sheet to attract the attention of firefighters.
 - If smoke conditions worsen before help arrives, get down on the floor and take short breaths through your nose. If possible, retreat away from the source of the flames, heat, or smoke.

IF YOU SEE VISIBLE FIRE OR SMOKE:

R - Rescue - Remove occupants from the affected area. Provide assistance to others as appropriate.

A - Alarm - Shout “**FIRE**” to report a fire to the other occupants in the immediate area of the fire. Activate the nearest fire alarm pull station to alarm building occupants (includes automatic FDNY notification). Call the NYP fire notification hotline 212-746-FIRE (3473).

C - Confine - Close all doors, including interior doors and windows, to the area while exiting. This will help restrict the potential spread of the fire.

E - Evacuate/Extinguish - Occupants on the fire floor and floor above the fire floor are required to evacuate immediately using the nearest safe evacuation route.

- Do not use elevators unless authorized by the Fire Department.
- Notify NYP Security, EHS personnel, or the Fire Department of any injured and/or physically impaired occupants who are unable to evacuate.
- Remain available to answer questions about the fire and the affected area.
- In the event of a small fire, only trained personnel may attempt to utilize a fire extinguisher, and only after the above R.A.C.E. steps have been initiated.

IF THERE IS A FIRE ALARM ACTIVATION:

Determine if you are on (1) a Fire Evacuation Floor or (2) an Alert Floor.

- Horn and strobe activation on your floor – Fire Evacuation Floor
- Advisory tone only (no strobe activation) on your floor – Alert Floor

Fire Evacuation Floor Response – Fire alarm activation is on your floor or the floor below.

- Evacuate immediately if you see fire or smoke, utilizing the evacuation procedures identified above. Otherwise, all personnel must immediately re-locate to their designated evacuation assembly areas.
- Listen for public address system announcements and/or floor Fire Wardens for instruction. The public address announcement will state the location of the fire alarm activation and the appropriate evacuation response.
- Evacuate as directed.

Alert Floor Response – Fire alarm activation in building but not on your floor or the floor below.

- Listen for further announcements over the public address system and/or Fire Wardens.
- Continue your regular work duties.
- Do not evacuate unless you see smoke or fire or are otherwise instructed by the Fire Department, Fire Wardens, or over the public address system. If instructed to do so, evacuate as directed.

4.50 SSF/SST – 77th Street Residence

BUILDING-SPECIFIC FIRE SAFETY AND EVACUATION PROCEDURES

GENERAL INFORMATION

Building Address: SSF - 444 East 77th Street, New York, NY 10075

SST - 442 East 77th Street, New York, NY 10075

Fire Alarm System: Apartments equipped with Smoke "Alarms" only

Evacuation Type: Residents are to follow Residential Fire Safety Plan and Notices

Total Evacuation Building – All occupants must evacuate

Evacuation Routes: Vertical Evacuation

Main Interior Stairwell

Fire Escapes - The fire escapes terminate in the back yard of the building.

To access 77th Street, re-enter the building through the basement, take the stairwell to **the first floor and exit**.

IF YOU SEE VISIBLE FIRE OR SMOKE:

R - Rescue - Remove occupants from the affected area. Provide assistance to others as appropriate.

A - Alarm - Shout "**FIRE**" to report a fire to the other occupants in the immediate area of the fire. Alarm people on floor by knocking on doors on way to the exit. **Call 911 once at a safe location to notify the Fire Department.** Do not assume the fire has been reported unless firefighters are on the scene. Call the Olin Hall desk attendant at 212-746-1009. No fire alarm pull station is located in this building.

C - Confine - Ensure EVERYONE leaves the room. Take keys to the apartment. Close, but do not lock door(s) to confine area and restrict spread of fire.

E - Evacuate/Extinguish - All building occupants must evacuate immediately using the nearest safe evacuation route.

- Feel apartment door and doorknob for heat. If not hot, open the door slightly and check the hallway for smoke, heat or fire.
- Remain available to answer questions about the fire and the affected area.
- Meet apartment members at a predetermined location outside the building.
- Notify the Fire Department if any injured, physically impaired, or missing occupants are unaccounted for or unable to evacuate.
- In the event of a small fire, only trained personnel may attempt to utilize a fire extinguisher, and only after the above R.A.C.E. steps have been initiated.

IF THERE IS A FIRE ALARM ACTIVATION:

- All building occupants must evacuate immediately using the nearest safe evacuation route.
- Refer to the evacuation procedures above for additional information.

UNABLE TO EVACUATE - EGRESS PATH BLOCKED BY FIRE OR SMOKE.

- Call 911 and provide address, floor, apartment number, and number of occupants.
- Seal the apartment doors, air ducts, or other openings where smoke may enter with wet towels or sheets.
- Open windows a few inches at top and bottom unless flames and smoke are coming from floors below. Do not break any windows.
- If conditions in the apartment appear life-threatening, open a window and wave a towel or sheet to attract the attention of firefighters.
- If smoke conditions worsen before help arrives, get down on the floor and take short breaths through your nose. If possible, retreat to a balcony or terrace away from the source of the flames, heat, or smoke.

RESIDENTIAL FIRE SAFETY PLAN

The Residential Fire Safety Plan can be at: https://ehs.weill.cornell.edu/system/files/fsp_77.pdf.

4.51 SR – Weill Family & Feil Family Residence

BUILDING-SPECIFIC FIRE SAFETY AND EVACUATION PROCEDURES

GENERAL INFORMATION

Building Address: 1393 York Avenue, New York, NY 10021

Fire Alarm System: Fire Alarm System with One-Way Voice Communication

Evacuation Type: Staged Evacuation – Fire Floor, Floor Above and Floor Below

Evacuation Routes: Vertical Evacuation

- A Stairwell
- B Stairwell

IF YOU SEE VISIBLE FIRE OR SMOKE:

- R - Rescue** - Remove occupants from the affected area. Provide assistance to others as appropriate.
- A - Alarm** - Shout “**FIRE**” to report a fire to the other occupants in the immediate area of the fire. Activate the nearest fire alarm pull station to alarm building occupants (includes automatic FDNY notification).
- C - Confine** - Close all doors, including interior doors and windows, to the area while exiting. This will help restrict the potential spread of the fire.
- E - Evacuate/Extinguish** - Occupants on the fire floor are required to immediately leave the floor and evacuate the building or relocate to another safe location at least three (3) floors below their present location.
 - Do not use elevators.
 - Notify the Fire Department of any injured and/or physically impaired occupants who are unable to evacuate.
 - Remain available to answer questions about the fire and the affected area.
 - In the event of a small fire, only trained personnel may attempt to utilize a fire extinguisher, and only after the above R.A.C.E. steps have been initiated.

IF THERE IS A FIRE ALARM ACTIVATION:

Determine if you are on either a Fire Evacuation Floor or an Alert Floor.

- Fire Evacuation Floors (fire floor, floor above and floor below)- Horns and strobes will be active.
- Alert Floors- Advisory tones only will be active (no strobe activation) on these floors.

Fire Evacuation Floor Response – Fire emergency is on your floor, floor above or floor below.

- Evacuate immediately if you see fire or smoke, utilizing the evacuation procedures identified above. Otherwise listen for public address system announcements for instructions. The public address announcement will state the location of the fire alarm activation and the appropriate evacuation response.
- Evacuate as directed.

Alert Floor Response – Fire emergency in building but not on your floor, floor above or the floor below.

- Listen for further announcements over the public address system
- Do not evacuate unless you see smoke or fire or are otherwise instructed by the Fire Department, or over the public address system. If instructed to do so, evacuate as directed.

4.52 ST - NYP Starr Building

BUILDING-SPECIFIC FIRE SAFETY AND EVACUATION PROCEDURES

GENERAL INFORMATION

Building Address: 525 East 68th Street, New York, NY 10065

Fire Alarm System: Coded Fire Alarm with Public Address System

Evacuation Type: Partial Evacuation – Horizontal Evacuation of Immediate Fire Area

Evacuation Routes: Horizontal Evacuation (Primary) Vertical Evacuation (Secondary)

Nearest Area of Refuse

7 and 8 Stairwells

K.L and F Buildings

5. FIRE OR SMOKE

B. Resuscite. Resuscitate patients in immediate danger.

R - Rescue - Rescue patients in immediate danger from fire or smoke. Other occupants must remove themselves from the affected area.

A - Alarm - Shout "FIRE SAFETY ALERT" to report a fire to the other occupants in the immediate area of the fire. Activate the nearest fire alarm pull station to alarm building occupants (includes automatic FDNY notification). Call the NYP fire notification hotline 212-746-FIRE (3473).

C - Confine - Close doors and windows in the affected unit and area (e.g., floor). This will restrict the potential spread of the fire. Seal doors with wet sheets or towels to prevent smoke from entering patient rooms. Locate personnel at medical gas valves for shutdown if authorized by the clinical staff. Clear corridors and restrict movement to maintain safe egress paths.

E - Evacuate/Extinguish - Occupants in immediate danger from a fire or smoke condition must evacuate horizontally to nearest area of refuge. Evacuate vertically down two or more floors when directed or when horizontal evacuation is unsafe. Do not use elevators.

- Notify NYP Security, EHS personnel, or the Fire Department of any injured and/or physically impaired occupants who are unable to evacuate.
- Remain available to answer questions about the fire and the affected area.
- In the event of a small fire, only trained personnel may attempt to utilize a fire extinguisher, and only after the above R.A.C.E. steps have been initiated.

IF THERE IS A FIRE ALARM ACTIVATION:

Determine the location of the fire.

- Building has a coded fire alarm system which identifies the location of fire alarm activation.
- Listen and note the sequence of the tones. Tone sequence will repeat. Example: 4 tones – short pause – 1 tone.
- Go to the nearest Fire Stairwell and locate the Fire Alarm Code Card.
- Review the Code Card and determine the location of the fire alarm system activation. Example: “4-1” tones = 1st Floor, B-Building, 1300 York Lobby
- Determine if the location of the fire alarm is in the Whitney Building and on your floor or the floor below and evacuate if it is.
- Listen for public address system announcements: “**FIRE SAFETY ALERT, FIRE SAFETY ALERT**” followed by the location of fire alarm activation and any further instructions.

Fire alarm activation located on your floor or floor below.

- Evacuate immediately following the evacuation procedures above. Close doors while evacuating.

Fire alarm activation not located on your floor or floor below.

- Listen for further announcements over the public address system.
- Continue your regular work duties.
- Do not evacuate unless you see a sign of fire or are otherwise instructed by fire safety personnel or over the public address system. If you are instructed to evacuate, follow the evacuation procedures above.

IF YOU SEE VISIBLE FIRE OR SMOKE:

- R - Rescue** - Remove occupants from the affected area. Provide assistance to others as appropriate.
- A - Alarm** - Shout "**FIRE**" to report a fire to the other occupants in the immediate area of the fire. Activate the nearest fire alarm pull station to alarm building occupants. **Call 911 once at a safe location to notify the Fire Department.**
- C - Confine** - Close all doors, including interior doors and windows, to the area while exiting. This will help restrict the potential spread of the fire.
- E - Evacuate/Extinguish - **Total Evacuation Building**** – All building occupants must evacuate immediately using the nearest safe evacuation route.
 - Do not use elevators.
 - Notify the Fire Department of any injured and/or physically impaired occupants who are unable to evacuate.
 - Remain available to answer questions about the fire and the affected area.
 - In the event of a small fire, only trained personnel may attempt to utilize a fire extinguisher, and only after the above R.A.C.E. steps have been initiated.

IF THERE IS A FIRE ALARM ACTIVATION:

- All building occupants must evacuate immediately using the nearest safe evacuation route.
- Refer to the evacuation procedures above for additional information.

4.63 Y - Weill Greenberg Center

BUILDING-SPECIFIC FIRE SAFETY AND EVACUATION PROCEDURES

GENERAL INFORMATION

Building Address: 1305 York Avenue, New York, NY 10065

Fire Alarm System: Fire Alarm System with Two-Way Voice Communication

Evacuation Type: Partial Evacuation – Fire Floor and Floor Above

Evacuation Routes: Vertical Evacuation

- A Stairwell
- B Stairwell

IF YOU SEE VISIBLE FIRE OR SMOKE:

R - Rescue - Remove occupants from the affected area. Provide assistance to others as appropriate. For patient care areas, rescue those in immediate danger from fire or smoke.

A - Alarm - Shout “**FIRE**” to report a fire to the other occupants in the immediate area of the fire. Activate the nearest fire alarm pull station to alarm building occupants (includes automatic FDNY notification).

C - Confine - Close all doors, including interior doors and windows, to the area while exiting. This will help restrict the potential spread of the fire.

E - Evacuate/Extinguish - Occupants on the fire floor and floor above the fire floor are required to evacuate immediately using the nearest safe evacuation route.

- Do not use elevators.
- Notify the Fire Department of any injured and/or physically impaired occupants who are unable to evacuate.
- Remain available to answer questions about the fire and the affected area.
- In the event of a small fire, only trained personnel may attempt to utilize a fire extinguisher, and only after the above R.A.C.E. steps have been initiated.

IF THERE IS A FIRE ALARM ACTIVATION:

Determine if you are on (1) a Fire Evacuation Floor or (2) an Alert Floor.

- Horn and strobe activation on your floor - Fire Evacuation Floor
- Advisory tone only (no strobe activation) on your floor - Alert Floor

Fire Evacuation Floor Response – Fire alarm activation is on your floor or the floor below.

- Evacuate immediately if you see fire or smoke, utilizing the evacuation procedures identified above. Otherwise, all personnel must immediately re-locate to their designated evacuation assembly areas.
- Listen for public address system announcements and/or floor Wardens for instruction. The public address announcement will state the location of the fire alarm activation and the appropriate evacuation response.
- Evacuate as directed.

Alert Floor Response – Fire alarm activation in building but not on your floor or the floor below.

- Listen for further announcements over the public address system and/or Wardens.
- Continue your regular work duties.

Do not evacuate unless you see smoke or fire or are otherwise instructed by the Fire Department, Wardens, or over the public address system. If instructed to do so, evacuate as directed.
