

Instructions

- The Pre-Hot Work Checklist must be completed daily by the Torch Operator or other responsible person, as assigned by the General Contractor prior to the start of hot work.
- The Fire Guard is responsible for maintaining the Pre-Hot Work Checklist at the work site during the work and making it available for inspection by any representative of EHS or the FDNY.
- This form must be returned to the General Contractor's representative upon completion of the hot work and the expiration of the fire watch. This form must be maintained on the premises for at least 48 hours after work is complete.

FIRE GUARD DAILY LOG BOOK FOR HOT WORK

- Each fire guard monitoring hot work must complete this log daily.
- Enter a check for each item after verifying it for compliance in each active hot work area. If an item is not compliant and the competent person designated for the hot work operation or the fire guard cannot correct it, then no hot work may proceed in the area, and the permit issuer must be notified.
- Notify personnel of any and all incidents that occur. Fires of all sizes must be reported even if they are immediately extinguished. If a fire cannot be extinguished immediately, contact emergency services (911) directly and activate the building's fire alarm system (use manual pull station).
- Report any fire-related to hot work operations in the comments section of this log.
- Print your name and sign this log at the end of your shift.

Before beginning and while performing Hot Work				
Permit	Posted by the fire guard at work area?			
Incident Reporting	Radio or phone on hand to notify personnel in case of incident?			
Fire Extinguisher	At least a 2-A:20-B:C rated fire extinguisher in work area? For torch-applied roofing systems, a 3-A:40B:C rated extinguisher is required.			
Combustibles	No wood, cardboard or other combustibles within 35" of the work area? Blankets protecting gas bottles in use?			
Flammables	Gas, Fuel, and other flammables no closer than 35" to the work area?			
Fire Guard	Fire guard has unobstructed line of sight of work area?
