Waste Storage & Removal

1. Containerize
   - Store all waste in a sealed compatible container. Keep containers closed at all times, except when adding waste. Use vented caps when needed.
   - Use secondary containment to prevent spills and to segregate incompatible waste streams.
   - Maintain waste in the Chemical Waste Satellite Accumulation Area until collection.

2. Label
   - Use the hazardous waste labels provided by EHS to mark all containers. Write full names of all chemical constituents, approximate percentages, and pH (if applicable). Do not use abbreviations.
   - Indicate all hazard characteristics (flammability, corrosiveness, health hazard, etc.). Do not date the containers.

3. Contact EHS
   - Once the containers are full, scan the QR Code to submit a Chemical Waste Request in Salute or visit https://ehs.salutesafety.com.

Unacceptable Storage/Disposal

- Never store more than 1 quart of liquid acutely hazardous waste (P-listed), or more than 1 kg of solid acutely hazardous waste.
- Never accumulate more than 55 gallons of hazardous non-acute waste.
- Never use evaporation or dilution as a treatment method.
- Never dispose of waste in the sink or trash unless listed in the approved non-hazardous chemical list on the EHS website.

For more information, please refer to EHS Program Manual 5.2 - Waste Disposal Procedures
